BLANCO UNIT
drink. prep. clean.

Drink. Prep. Clean. Everything you need, all in one place.
Sink, tap and waste management seamlessly combined in
the BLANCO UNIT for a stunning, creative kitchen hub at the
heart of your home. **Discover more at blanco.co.uk**

Welcome to the BLANCO UNIT à la Carte collection. We spend more than half of our time in the kitchen using the sink, tap and waste area. So, BLANCO focuses on improving how this space operates. Adding intelligent features, introducing new designs and innovative materials to make kitchen life easier, everyday.

With the BLANCO UNIT it all flows naturally. Sinks, taps and bins are the most commonly used items in the kitchen. However, they are rarely given the consideration during planning that we think they deserve. This collection combines our premium sinks with a BLANCO tap included in the price. You can choose to upgrade your tap, add an integrated bin, organisational system or food waste disposer at discounted prices, only available in this brochure when purchased as part of a pack. You can even add lighting to create the perfect pack to fit your needs. Create a BLANCO UNIT to suit both your style and your lifestyle.

Heinrich Blanc, founder of BLANCO

COMMITTED TO INNOVATION

Germany since 1925.

Quality has been a driving force at BLANCO, ever since the company was established in Germany back in 1925. Started by Heinrich Blanc, the business was founded on the principle of offering its customers the best in terms of design, function and innovation. Whilst our products may have changed in response to changing times and needs, our commitment to quality and service remains as firm as ever.

Sinks, taps and bins are the most frequently used items in our kitchens, helping people create a space perfect for their individual lifestyle has always been at the heart of our thinking. And it always will be.

THINGS TO CONSIDER:

The size of your sink unit

It is essential to measure the cabinet width where your sink will be installed. The bowl, or bowls in the case of a multi-bowl sink, will need to fit into this space. Each sink in this brochure will show a minimum cabinet required to house it successfully.

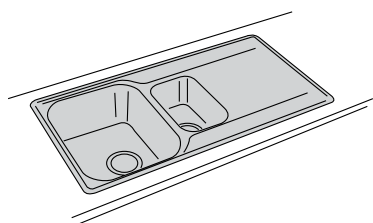

Installation formats

Inset sinks

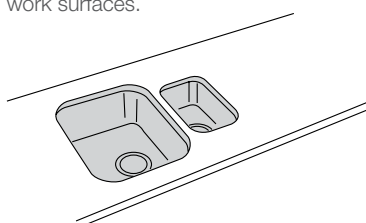

Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

Undermount sinks

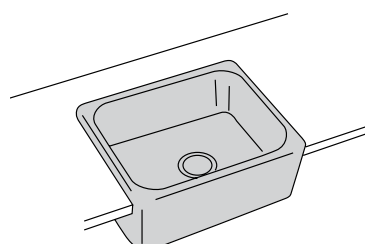

Undermount sinks are installed underneath the work surface and therefore require a solid surface worktop such as granite or wood; they are not compatible with laminate work surfaces.

Belfast sinks

Belfast sinks can be fitted undermount, as pictured above or inset with a slight raised edge profile as in the drawing below.

USING BLANCO UNIT À LA CARTE

Sink and tap packs you can upgrade to create your own perfect BLANCO UNIT.

Having taken great care in selecting the furniture and appliances for your new kitchen, it's just as important that the sink and tap you select work for your space and your lifestyle, now and long into the future.

Our á la Carte Collection lets you create your own sink and tap 'pack' - each sink comes with a Chrome mixer tap included in the price. However, should you wish, you can upgrade your tap to another in the collection - all at reduced prices. The savings don't stop there though, select from a range of great value in-cabinet waste management or storage systems, food waste disposers and kitchen lighting. All at discounted upgrade prices only available in this brochure when purchased together with a sink and tap pack.

1. Choose your ideal sink

Select the sink that suits your style and lifestyle. Are you a fan of Stainless Steel, Ceramic or how about stone composite? Silgranit is our leading composite material. Temperature resistant, scratch resistant, hygienic and available in up to ten colours - Silgranit is as strong and easy to care for as it is beautiful and tactile.

Also, consider the installation method that you need. See the 'Things to consider' information on page 4 to select a method that is right for you and your space.

2. Choose a tap to suit you

The CAMIA® mixer tap in Chrome comes included in the price of all the sinks in the á la Carte Collection. The monobloc CAMIA is a popular and contemporary tap choice.

If the CAMIA isn't to your requirements, we have put together an á la Carte menu of over 100 tap upgrades (see page 60). These include our feature packed Smart Tap range and our amazing Drink Systems collection of true boiling and filtered water taps. We also have semi-professional taps, and a wide selection of contemporary and traditional mixer taps - all available at reduced upgrade prices.

3. The finishing touches

Turn your sink and a tap into a BLANCO UNIT, a multi-functional, creative space with the addition of some ingenious integrated solutions from page 72.

Our range of in-cabinet waste management and storage systems will turn that 'no-mans-land' under your sink into super-practical space that simply works.

Don't forget our other finishing touches from colanders and caddies to food preparation boards and crockery racks, waste disposal units and kitchen lighting solutions. Create a space to be proud of at the heart of your kitchen.

WHICH MATERIAL TO CHOOSE?

This guide compares the features and benefits of our sink materials.

You have your own unique vision of what makes the perfect kitchen. How you use your sink is important when deciding which material is right for your kitchen because each material has individual characteristics and benefits. Our range covers everything from the latest contemporary trends to classic lines, so all you have to do is choose the one that best complements your cooking style, kitchen theme and personality.

STAINLESS STEEL

Stainless Steel differs from most materials in that it can be integrated into almost any kitchen environment. Its most important properties:

- Timeless classic aesthetics
- Does not rust
- Completely heat resistant
- Hygienic and suitable for food preparation
- Stain and acid resistant
- Easy to care for

BLANCO uses only the highest quality 18/10 Stainless Steel to meet the most exacting requirements.

SILGRANIT®

Silgranit is a unique beautiful sink material which has been patented and developed exclusively by BLANCO.

- Available in attractive colours all with a uniform surface finish
- Superior durability and a smooth silk surface with the look and feel of natural stone
- Easier cleaning, thanks to its water repellent surface
- With Hygiene+Plus, a shield against dirt and bacteria, tests have confirmed that bacterial growth is reduced by an average of 98%.

SILGRANIT® PuraDur® with the patented hygiene protection formula

CERAMIC

Sinks made of BLANCO Ceramic create a special homely atmosphere.

Their attractive appearance and glazed surface finish blend with both traditional and modern kitchens.

Modern production methods and special manufacturing techniques together with the skills of our craftspeople ensures that our quality remains constant. Care throughout the production process helps to produce a sink which will maintain its appearance for years to come. Its most important properties:

- Easy to care for
- Food stain and acid resistant
- Colour safe
- Resistant to heat in domestic use
- Hygienic and suitable for food preparation

SINKS AND TAPS EXPLAINED

A key to important features and considerations.

SINKS

Inset: The frame of an inset sink sits on top of the work surface. These sinks are compatible with any work surface, including laminate worktops.

Undermount: An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.

Belfast: Belfast style sinks are installed either 'dropped-on' to a purpose-built cabinet or by using installation brackets.

Inset Sink Profiles

BLANCO sinks come with a range of different profiles.

Standard: Edge is rolled over to meet the worktop.

IF and IF/A: Unique 1mm flat edge profile for inset flush installation.

IFU: Suitable for inset, flushmount and undermount.

Cabinet Width

The cabinet width measurement denotes the measurement (mm) which the sink bowl(s) need to fit into.

Bowl Configuration

Select the correct sink configuration for your kitchen.

LHB, RHB and UNI (Universal):

Indicates whether an inset sink is available with a Left Hand Bowl (LHB) or Right Hand Bowl (RHB).

UNI (Universal) indicates an inset sink suitable for both left and right configurations.

If the sink does not have a drainer, the handing refers to the Main Bowl.

TAPS

Water Pressure

BLANCO has a range of taps suitable for low and high pressure systems. BLANCO considers taps

0.3 bar and below as low pressure.

Features

Pull-Out Spray: Features a pull-out spray, useful for directional rinsing.

Aerator: Mixes air into the water to give a champagne flow. Some taps are fitted with a flow straightener.

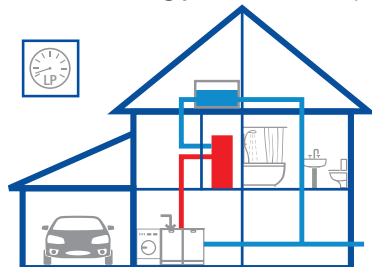

Recommended solid work surface worktop or SILGRANIT® sink:

Alternatively with the use of a tap stabilising bracket.

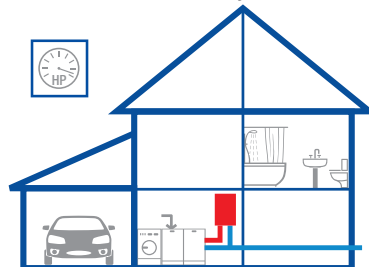

Tap flow rates explained

Before choosing your BLANCO tap it is essential to check whether you have a high or low pressure water system

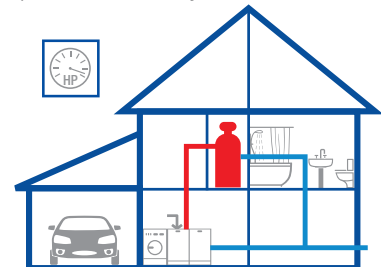

Low pressure (Gravity-fed system)

You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

High pressure (Combi-boiler system)

You have a boiler unit but no hot water cylinder, the boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

High pressure (Pumped system)

You have a hot water cylinder with an expansion vessel on top (often called Megaflor), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

At BLANCO we consider anything 0.3 bar or below as low pressure. Any higher is considered high pressure.

INSET SINKS

Inset sinks with drainer and tap pack, including strainer waste and fittings.

Inset sinks are installed from above into a pre-prepared hole in your worktop. It offers the widest choice of sink shapes, sizes and styles.

Installation formats

It is essential to correctly measure the cabinet width where your sink will be installed. The bowl, or bowls in the case of a multi-bowl sink, will need to fit into this space. Each sink in this brochure will show a cabinet size, and your cabinet width needs to be equal to or greater than the stated measurement.

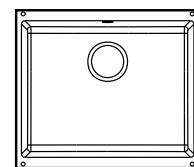

Bowl configurations

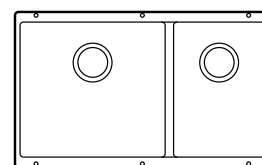

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

BLANCO refers to the large bowl when stating if it is a Right Hand Bowl (RHB) or Left Hand Bowl (LHB).

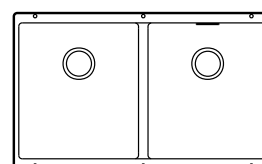

Other sinks are reversible which indicates the bowl/bowls can be positioned on either side. Please check which format suits your kitchen best before ordering.

CREATE YOUR KITCHEN HUB

Waste management and in-cabinet storage solutions help you reclaim that no-mans-land area under your sink.

Combine your ideal sink with your perfect tap and add on a system that will ensure that long-forgotten space becomes a place that you can organise easily and make practical use of.

Whether you choose to use it to separate your recyclables, install a waste disposal, organise your cleaning products or contain your pet paraphernalia – we have a solution. BLANCO UNIT has it covered. Find the perfect integrated organisation and storage system from page 72.

Three is the magic number

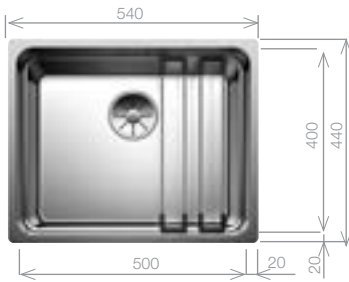

Three working levels, three material options and three installation methods to choose from. The ETAGON system has all the versatility of a large sink centre, yet requires little space. With integrated ledge used in conjunction with the specially developed ETAGON rails, this modern bowl creates a time-saving, space-saving, creative hub in your kitchen.

One bowl, two rails, three levels - available as undermount or inset installation.

ETAGON bowls are also available in nine colours of Silgranit® or Ceramic in four colours.

BLANCO has fundamentally modernised the classic sink area. Designers and developers have managed to perfectly combine the successful features of the traditional CLASSIC model with contemporary design. In addition, the extended functionality meets the higher requirements for ergonomics and comfort when working. The result is BLANCO CLASSIC Neo – the evolution of a classic.

The SmartCut chopping board fits safely on the drainer.

The versatile multifunctional colander in Stainless Steel can be used in the main and the additional bowl.

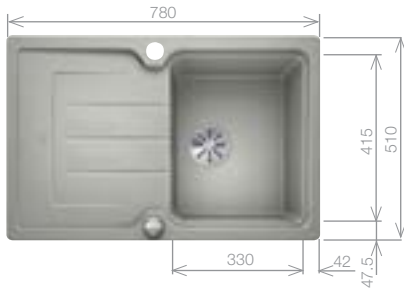

The colander and the chopping board can be used in parallel to facilitate ergonomic working.

Three is the magic number

Three working levels, three material options and three installation methods to choose from. The ETAGON system has all the versatility of a large sink centre, yet requires little space. With integrated ledge used in conjunction with the specially developed ETAGON rails, this modern bowl creates a time-saving, space-saving, creative hub in your kitchen.

One bowl, two rails, three levels - available as undermount or inset installation.

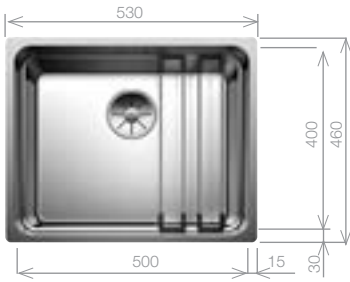

ETAGON bowls are also available in nine colours of Silgranit® or Ceramic in four colours.

TAP UPGRADES

Trade up to your ideal mixer tap

All sinks sold in this brochure come with the high quality BLANCO CAMIA® mixer tap included in the pack price, however, you can make your kitchen more individual by upgrading to one of our extensive range of taps.

Water Pressure

BLANCO has a range of taps suitable for low and high pressure systems.

BLANCO considers taps 0.3 bar and below as low pressure.

Features

Aerator: Mixes air into the flow of water to give a champagne-like flow. Some taps are fitted with a flow straightener.

Pull-Out Spray: Features a pull-out spray, useful for directional rinsing.

Colour options

Dual Flow

Recommended solid work surface worktop or SILGRANIT® sink:
Alternatively with the use of a tap stabilising bracket.

Smart Tap Features

Volume

An integrated measuring function and touch control make it simply smart.

Hot

Boiling, filtered, taste-free water in an instant from a titanium tank.

Filter

A five stage filter ensures the purest of water.

Senso

Control the water with a wave of your hand, or pot, or pan.

Hot

Why choose BLANCO TAMPERA Hot?

It's quite simple really. Instant, beautifully filtered, 100°C boiling water at the twist of a child-safe lever from an ultra-safe, super-hygienic and taste-free titanium boiler, delivered through an insulated spout that doesn't get hot.

We have developed the TAMPERA Hot to give you all the time, energy and space-saving benefits of a hot tap, but with none of the worry. As you would expect from BLANCO, it's engineered to be better.

Still not convinced?

- A titanium high-pressure boiler, not a copper or stainless steel tank like many others; makes our system stronger, more hygienic and the water tasteless – important when making tea
- Unlike most other hot taps, the TAMPERA Hot comes with a five-stage filtration system as standard – not as an optional extra – to ensure the purest water and protect the system
- The system includes a fool-proof digital Flowmeter that audibly alerts you when it is time to change the filter, as standard

The five-stage filter system comes with a digital Flowmeter will audibly alert you when the filter cartridge needs replacing.

NEW BLANCO EVOL-S PRO

Safe, strong and smart with features engineered to be better.

The brand new, semi-professional tap joins the popular EVOL-S family, sporting high quality smart water system options and the proprietary EVOL rotary measuring function, making both the Filter and the 4-in-1 Hot and Filter versions completely unique.

Filter

Volume

EVOL-S Pro Filter

PVD Steel
456346
+£848 inc VAT

- 3-in-1 semi-professional mixer tap with flexible spout and two flow settings
- Dispenses defined volume of filtered cold water from a dedicated spout to ensure purity of filtered flow
- Simultaneous use of both spouts when required
- Supplied with five-stage filtration filter
- Supplied with Flowmeter which advises when filter needs to be changed
- High pressure supply only, minimum 1.0 bar

Why choose BLANCO Evol-S Filter?

The simple functional beauty of the PVD Steel semi-professional mixer tap with dual spray options, is taken to the next level with the EVOL-S Pro Filter.

The separate spout delivers perfectly pure and balanced, five-stage filtered water via a unique measuring function. Select exactly the amount of water you need and tap the button - no waste, no fuss.

EVOL-S Pro Hot and Filter

PVD Steel
456347
+£1648 inc VAT

- 4-in-1 semi-professional mixer tap with flexible spout and two flow settings
- Dispenses defined volume of 100°C filtered boiling or filtered cold water from a separate, insulated spout to ensure safety of use and purity of filtered flow
- Boiling water is true 100°C at the outlet
- Simultaneous use of both spouts when required
- 4 litre capacity hot water tank
- Extremely resistant, taste-neutral hygienic titanium tank
- Supplied with five-stage filtration system
- Supplied with Flowmeter which advises when filter needs to be changed
- High pressure supply only, minimum 1.0 bar

Why choose BLANCO Evol-S Hot and Filter?

A stunning semi-professional mixer tap, in Stainless PVD Steel finish, delivers standard hot and cold water with two flow options via the mixer lever on the right.

The unique EVOL-S rotary control on the left is the real game changer. Select between cold filtered and true-boiling filtered and then set the dial to deliver exactly the amount of water you need. Your selection is delivered through an insulated second spout. Quite simply, it is engineered to be better.

Supplied with UK 3-pin plug

Discover the EVOL-S Pro range in action at www.blanco.co.uk/evolpro

Head to our website to get the full experience.

It's difficult to explain how amazing the EVOL-S Pro range is with a few words and images on the pages of a brochure. Watch some great videos of the stunning smart taps in action on our website. Scan the QR code (right) or type the web address above into your browser.

Drink. Prep. Clean.

The BLANCO UNIT is everything you need, all in one place. Sink, tap and integrated organisation or waste management. All seamlessly combined for a stunning, creative kitchen hub at the heart of your home.

Visit: blanco.co.uk/blancounit

The sink space is the busiest area of the modern kitchen, on average we spend 60% of our time in the kitchen, at the sink. Making drinks, preparing food, washing and cleaning up afterwards. It's little wonder then, that the sink, tap and bin are the most-used kitchen items.

Our BLANCO UNIT solutions will save you time by adding practicality and simplicity to daily use of the sink area. Our material and design innovations will ensure everything looks and works beautifully, while our depth of range means we have the ideal combination of products to suit your style, and lifestyle.

ISE WASTE DISPOSAL UPGRADES

A simple addition to your kitchen.

When fitting a sink in your new kitchen or as part of a make-over why not consider the added convenience of installing a food waste disposer? It is estimated that over 60% of household waste is food from preparation and leftovers. Using a waste disposer to grind down and flush away unwanted leftover food waste reduces mess, is more convenient, hygienic and saves time. The environment benefits, less waste finishes up in landfill sites and the waste food can also be converted into soil conditioner at the water treatment plant.

Simply turn on the cold tap, switch on the disposer and feed food waste into the disposer. The waste is both simply and quickly ground into fine particles and flushed away into your regular waste system.

The waste disposer fits conveniently to the sink waste, located out of sight in the cupboard under the sink.
